Paper Title

Comparative Study of Popular Task Management Tools

Abstract

Modern task managers are used by many people to organize tasks, both individually and among teams. To test which tool works better, the following applications – Trello, Asana, ClickUp, and Microsoft To Do – were analyzed both by comparing their features and through practical experience working with them. The applications were assessed based on an actual implementation of task creation, tracking, and completion within the framework of a controlled environment of academic environment. The factors that have been considered included user friendliness, collaborative support, performance, and costs. It was revealed that all four tools are most suitable for different categories of users. The simplest tools are recommended for new users, while feature-rich applications provide for maximum customization opportunities, albeit at a higher cost and learning curve time. Therefore, the conclusion is made that the most appropriate tool is defined by user requirements primarily.

Submission Questions Response

1. Corresponding author Email ID

Provide Email ID of corresponding author

yashisaini2003@gmail.com

2. Contact number with country code

Provide Whatsapp number of corresponding author with country code

+91 9306899758

3. Author's Information

I confirm that I have listed the title of the paper and the names, email addresses and affiliations of all contributed authors in the submission system that match the order as given in the submitted paper

Agreement accepted

4. Co-author's Consent

I confirm that I have discussed about this submission with all co-authors and authors have approved the paper and agree with its submission to this conference.

Agreement accepted

5. Certificate of Originality

I confirm that neither the paper nor any parts of its content are currently under consideration or published in another conference/journal and the paper is free from plagiarism

Agreement accepted

6. Author's Consent

It is confirmed that at least one author will register in full to attend and present the paper at the Conference.

Agreement accepted

7. The use of artificial intelligence (AI)-generated text (e.g., by ChatGPT)

I confirm that no text in the paper is AI-generated.

Agreement accepted
